Plastic bags, but at a price!

JOHANNESBURG : Some people were **resentful** yesterday when they realised they would have to pay for their plastic bags from Friday when buying groceries.

"Sometimes it's your last **R20** in your pocket. Are you now **expected to** spend it on plastic bags?" a domestic worker asked.

5 The price of a bag ranges from 25 to 46 cents.

Mary Phiri, 64, said the rich would **be able to afford to pay**, but the poor would not. "This will cause problems."

Phil Dukashe, 27, a **freelance producer**, said he disagreed with the new legislation because "people now have to budget for plastic bags and for groceries".

10 The new law, which requires **manufacturers** to produce thicker bags that last longer, is to promote repeated use of the bags and encourage recycling. [...]

Customers may choose whether to buy the new government-specified bags, take their own bags or carry their shopping without bags.

15 Many people interviewed at supermarkets in Johannesburg **were unaware of** the new law.

Simon Molele, a gardener, said: "I didn't know I'd have to pay for plastic bags. This is a bad idea."

Celia Theart, a social worker, disagreed. "It's a good idea. It's environmentally friendly. In the beginning it might be a problem, but people will get used to it."

20 Giovanni Pisanello, 76, said: "In Europe people pay for plastic bags. When you go shopping, you just hang your bag on your shoulder and go."

Supermarkets have been advertising the reasons for the change.

25 Environmental affairs and tourism spokeswoman Phindile Makwakwa said some of the money made from the new plastic bags would be used to run a non-profit company to **manage** recycling. "This company will encourage the recycling of plastic bags and will set up points across the country where bags can be dropped off for recycling," she said.
